E.B.U. REVIEW

Published bimonthly by the Technical Centre of the E.B.U.

PART A — TECHNICAL

Contents

1971

Numbers 125 to 130

(February, April, June, August, October, December)

Editorial, Advertising and Publishing Office : Avenue Albert Lancaster 32, B-1180 Brussels (Belgium)

ARTICLES

FUJIO T and KOMOTO T.	Transmission of the television sound signal with the colour-synchronising signal	128–145
GELUK J.J.	Some aspects of single-sideband broadcasting	127–114
GOURIET G.G.	Hybrid quadrature modulation – An efficient system for LF-MF broadcasting	129–200
GSCHWINDT A.	Some reflections regarding the design of future amplitude-modulated sound-broadcasting transmitters	129–194
HABERKANT E., HEINZELMANN G. and VOGT K.	The measurement of ionospheric cross-modulation	126– 50
HEYDEL J.	The limits of solid-state techniques for television transposers	125– 9
HORCLOIS J. and VODOVAR M.	Computer programme for measurements of the power radiated by an aerial	126– 56
KAUFMANN A. and SAUTER D.	The influence of modern colour-receiver phosphors on the spectral characteristics of cameras	128–149
KIHARA N.	Colour cassette system for the NTSC and Japanese colour-television standards	125– 2
KNIGHT P.	Medium-frequency sky-wave broadcasting – Effect of polarisation on interference	125– 15
LARI G. and MORO G.	Low-power MF broadcasting transmitters in the European Broadcasting Area	129–205
MACK Z.	Measuring the pilot-tone phase in stereophonic VHF/FM broadcasting	127–106
MANSON W.I.	The summation of sound signals from simultaneous commentaries	126– 63
MILLS D.G.H.	The problem of loudness and level in broadcasting	126– 78
OLVER A.D., LYNER A.G. and KNIGHT P.	A computer programme for calculating sky-wave field-strength at medium frequencies	125– 18
PESARI P.	Radio and television coverage of the Xth European Athletic Championships	130–244
RICCARDI M. and RODINO DI MIGLIONE F.	Experimental research into long-distance UHF propagation over the Mediterranean Sea	127– 98
RICCIO T. and GRASSETTI A.	The use of wind-driven electro-generators for feeding small radio and television rebroadcast stations	130–238
SCHÜSSLER H.	The influence of new technology on filter techniques in receivers for sound and television broadcasting	130–250
WHYTHE D.J.	The use of active elements in highly-directional VHF television receiving aerials	128–159
Editorial, HANSEN G.	Direct broadcasting from satellites	128–142

The numbers of the issues are printed in bold type and the page numbers in Roman type.

INTERNATIONAL NEWS

Calendar of international meetings dealing with sound and television broadcasting engineering 125– 28; 128–170; 129–226

I.T.U. : Seminar on the planning of broadcasting systems in Africa 127–118

World Administrative Radio Conference for Space Telecommunications . . . 128–172

C.C.I.R. : Special Joint Meeting of C.C.I.R. Study Groups 126– 68
Interim meetings of C.C.I.R. Study Groups 130–261
Publication of the documents of the C.C.I.R. XIIth Plenary Assembly . 127–120

C.C.I.T.T. : Meeting of Special Study Group D 127–118
Meeting of Working Party IV/3 130–261

I.F.R.B. : Implementation of recommendations of the Panel of Experts to devise measures for reducing congestion in the high-frequency bands 127–119; 129–218
New edition of the International Frequency List 127–120

C.E.P.T. : Meetings of the Telecommunication Commission 129–214

C.I.S.P.R. : Working Group meetings 129–215

I.E.C. : Meeting of Technical Committee 12 (Radiocommunications) 129–216

I.S.O. : Meeting of Technical Committee 36 (Cinematography) 128–171

Expansion of television during 1970 . . . . . 126– 80

Television satellites 125– 37

UHF television offsets – Informal meeting of experts (Brussels, January, 1971) 126– 89

International meeting on frequency-planning in the 100-104 MHz band (Darmstadt, September, 1971) 130–288

E.B.U. participation at Telecom 71 128–183

ALGERIA

Opening of an HF transmitting station 129–219
The first mobile television-recording unit for the R.T.A. 129–220
Algiers Network-control Centre 126– 70

AUSTRALIA

FM sound-broadcasting inquiry 126– 70
Plans for colour-television 126– 71

AUSTRIA

O.R.F.'s new broadcasting centre (Vienna) 129–220
Eisenstadt annex to the Burgenland regional studios 130–262

BELGIUM

The television master control suites at the new R.T.B./B.R.T. Broadcasting House . . . 130–263
Expansion of colour television 130–265
Earth-station for satellite telecommunications 127–120

CANADA

The CTV Network 127–121
First high-power UHF television transmitter enters service 125– 29
A new telecommunication satellite project 127–123
110th SMPTE Technical Conference 128–174

FINLAND

New sound programme continuity suite for Yleisradio 130–265
Collapse of a mast in Lapland 125– 29

FRANCE

Death of General Marien Leschi 129–221
New mobile radio-relay vehicle for television outside broadcasting 130–266
Coverage of the commemoration of the 2500th anniversary of the Persian Empire 130–280

GERMANY

Sound broadcasting

New HF transmitting station (Deutsche Welle) 128–174
Further relay-transmitters for the Deutsche Welle 125– 30
New single-sideband transmissions 125– 30
Sound broadcasting in the 100-104 MHz band in Europe 128–174
New VHF/FM monitor receiver 127–123

Television

Experimental 12-GHz broadcasting in Berlin 127–123
Additional sound carrier in television 127–123

Earth-stations for satellite telecommunications 125– 30; 127–124; 128–174
The effects of high buildings on reception 125– 30
High-power reserve electricity supply for the W.D.R. 125– 30
Professional meetings, commercial exhibitions 128–175

HONG-KONG

Opening of second Earth-station 130–267

INDONESIA

Coverage of Royal Tour (H.M. Queen Juliana of the Netherlands) 130–271

IRAN

Coverage of the commemoration of the 2500th anniversary of the Persian Empire 130–280

IRELAND

First R.T.E. colour OB Unit 130–267
Development of the cable-distribution systems 130–269

ITALY

Remote control of four transmitting stations 130–269
Vehicle-mounted aerial-support for transportable television links 126– 71
Linking of a television film-recorder and a developing machine 125– 31
Seminar on pulse-code modulation 127–124
Eighteenth International Scientific Congress on Electronics 127–124

JAPAN

Experimental SHF transmissions 126– 72

JORDAN

New television transmission facilities 130–271

LUXEMBURG

Discontinuation of 819-line transmissions 127–124

NETHERLANDS

National television control centre destroyed by fire 128–175
New television switching centre at Hilversum 129–222
Sixth colour-television studio enters service 128–176
Sound outside-broadcast vehicle 127–125
Colour-television OB vehicle 125– 31
The N.O.S.'s first television tape-recording vehicle 126– 72
Coverage of Royal Tour in Indonesia 130–271
Experimental radio-controlled writing system 130–271

NEW ZEALAND

Earth-station for satellite telecommunications enters service 130–273

NORWAY

New sound broadcasting studios in Bergen 130–273
Introduction of colour television 128–177
First OB vehicle for colour television 130–274
The Oslo Television Centre :
Central switch and apparatus room 126– 73
New presentation suite 128–177

SPAIN

New HF transmitting station (Noblejas) 127–126
Regular transmissions via satellite to the Canary Islands 128–178
Television commentary vehicle 128–178

SOUTH AFRICA

Preparations for television 130–275

SWEDEN

New 500-kW HF transmitters for Radio Sweden 130–275
Discontinuation of wired broadcasting 126– 74
Colour-television OB vehicle 125– 33
Stereo OB vehicle 128–178
" Musical lighting " in the television studio 125– 34
Prefabricated plastic cyclorama 128–179
Broadcasting facilities in the new Parliament building 128–180

SWITZERLAND

HF transmissions from Sottens 130–276
International Television Symposium and Technical Exhibition, Montreux 127–127

UNITED KINGDOM

Sound broadcasting

Independent Sound Broadcasting 126– 74
Solid-state 400-W Band-II transmitter 129–224
Expansion of stereophonic broadcasting 130–278
Sound-recording using digital techniques 128–182
Introduction of improved recording tape by the B.B.C. 128–182
Portable compander used during international music transmissions 126– 76

Television

Expansion of the I.T.A. UHF network 126– 75; 128–181; 130–278
First I.T.A. rebroadcast transmitter enters service 129–223
New engineering and administrative Centre planned for I.T.A. 126– 76
Colour television :
Conversion of studio facilities at Glasgow for colour operation 130–277
Colour television standards conversion at the B.B.C. 125– 34
Colour available in all Independent Television mainland regions 129–223; 130–276
Trial of a " soft-keyed " overlay at Lime Grove Studios 130–278
Measurement of the steadiness of colour film 130–278
Colour in the I.T.A.'s "Television Gallery " 130–279
I.T.A. work on digital television line-standards conversion 127–127; 129–224
Introduction of insertion-signal testing by the I.T.A. 126– 75
Filtered air-supply for television tape-machines 128–181
Computer terminal installed at B.B.C. Television Centre 130–277
Film '71 (B.K.S.T.S. technical conference) 125– 35

Retirement of Mr. E.L.E. Pawley from the B.B.C. 129–223
Opening of new B.B.C. Broadcasting Centre for the Midland Region (Birmingham) . . . 128–180
Emley Moor tower in its final form 130–277
" Open University " broadcasting starts 125– 34
Electrical interference with sound and television reception 130–278
I.E.E. Centenary 127–126; 128–181

UNITED STATES

F.C.C. plans for the regulation of cable-distribution systems 128–182
The receiver market in 1970 . . . . . 125– 35

VATICAN STATE

Increase of power on MF 126– 76

YUGOSLAVIA

Preparations for colour television 126– 77

Broadcasting stations on the high seas 125– 36

EUROPEAN SOUND AND TELEVISION BROADCASTING STATIONS

Conditions in the LF and MF spectrum :

at 1st January, 1971 . . . . . 125– 38
at 1st March, 1971 . . . . . 126– 82
at 1st May, 1971 127–129
at 1st July, 1971 (with a chart showing the situation in the spectrum) 128–191
at 1st September, 1971 129–225
at 1st November, 1971 130–289

Conditions in the Band-II spectrum (VHF/FM sound broadcasting) :

at 1st January, 1971 . . . . . 125– 38
at 1st March, 1971 . . . . . 126– 82
at 1st May, 1971 127–129
at 1st July, 1971 128–191
at 1st September, 1971 129–225
at 1st November, 1971 130–289

Conditions in the Bands I, III and IV/V spectrum (television broadcasting) :

at 1st January, 1971 . . . . . 125– 38
at 1st March, 1971 . . . . . 126– 82
at 1st May, 1971 127–129
at 1st July, 1971 128–191
at 1st September, 1971 129–225
at 1st November, 1971 130–289

ABSTRACTS AND REVIEWS

Recent publications : 125– 39; 128–184; 130–283
Noteworthy articles 125– 40; 126– 83; 127–130; 128–185; 129–227; 130–283

E.B.U. ACTIVITIES

Technical Committee

Twenty-third meeting, London, March, 1971 . . . . . 126– 93

Bureau of the Technical Committee

Forty-third meeting, Taormina, September, 1971 129–235

Working Parties

Working Party A (AM sound broadcasting)

Brussels meeting, December, 1970 . . . . . 125– 46
Hamburg meeting, April, 1971 127–136
Taormina meeting, October, 1971 130–290

Working Party B (Ionospheric propagation on kilometric, hectometric and metric - Band I - Waves)

Lisbon meeting, October, 1971 130–295

Working Party G (Recording of sound and pictures)

Sub-group G1, Hilversum, April, 1971 127–138
Sub-group G2
Hilversum, April, 1971 127–139
Turin, November, 1971 130–293
Sub-group G3
Zurich, December, 1970 . . . . . 125– 45
Paris, October, 1971 130–292
Meeting of the Chairmen of the three Sub-groups, Montreux, May, 1971 127–140

Working Party K (Television and FM sound broadcasting)

Sub-group K2, Brussels, January, 1971 . . . . . 126– 91
Sub-group K3, Brussels, March, 1971 . . . . . 126– 91

Working Party L (International network operations)

" Teleprinter Network " Sub-group :
Brussels, March, 1971 . . . . . 126– 93
London, August, 1971 129–233

Working Party M (International network transmission)

Coordinating Committee, London, January, 1971 . . . . . 125– 47
" Insertion-signal " Sub-group, Paris, February, 1971 . . . . . 126– 92
" Synchronising-signal " Sub-group, Turin, September, 1971 129–234

Working Party N (Eurovision Satellite Scheme)

Brussels meeting, November, 1971 130–296

Working Party S (Stereophonic broadcasting and multiple-modulation systems)

" Two sound channels in television " Sub-group, Brussels, October, 1971 130–291

Joint C.E.P.T./E.B.U. meeting, Montreux, May, 1971 128–192

Fourth meeting of the Heads of E.B.U. Members' Research and Development Departments, London, September, 1971 129–233

Eurovision

Televised couverage of the Apollo-15 mission 129–225
